Tools for Data Science
Data Science Methodology
Data Analysis with Python

Samali Das

IBM Certified Data Scientist | Former Machine Learning Intern @
Azure Software Pvt. Ltd. | Python · SQL · Scikit-learn · FastAPI |
Data Visualization
Chennai, Tamil Nadu, India

Summary

I'm a Final-year Computer Science and Engineering student at SRM Institute of Science and Technology, who finds real satisfaction in turning messy data into something a machine can act on. Most of what I know, I've learned by building things end-to-end and then figuring out what broke. My core focus: Machine Learning, Data Visualization, and Predictive Analytics using Python. My work spans an industrial predictive-maintenance project from an internship at Azure Software Pvt. Ltd., where models trained on 10,100+ sensor records reached 83% precision in fault detection; an IBM-certified data science capstone forecasting spacecraft landings; and a personal weather-analytics tool covering 5 cities, built with Python and SQL. I like the moment a dataset starts making sense, and I don't mind rebuilding a pipeline twice to get there. Always glad to compare notes with anyone working on similar problems!

Experience

Intellects Club SRM Ramapuram

1 year 7 months

Operations Log Lead

July 2025 - March 2026 (9 months)

- Directed operational planning for technical events after being promoted from the Event Management domain.
- Coordinated logistics across cross-functional teams to keep club initiatives running on schedule.

Event Organizer

September 2024 - July 2025 (11 months)

D S Infotech Pvt Ltd

Technical Support Intern

June 2025 - July 2025 (2 months)

Kolkata

- Diagnosed and resolved application-related issues for senior IT professionals using targeted SQL queries.
- Completed a structured technical support training program while handling live support cases.

Azure Software Pvt. Ltd.

Machine Learning Intern

December 2024 - January 2025 (2 months)

Kolkata

- Built a predictive maintenance model in Python that flagged equipment faults across 10,100+ historical sensor records at 83% precision.
- Engineered features from 9 operational metrics — temperature, pressure, humidity, door activity, and power draw — to feed the fault-detection pipeline.
- Benchmarked four algorithms (Isolation Forest, Random Forest, HBOS, and Meta's Prophet) to find the strongest performer for anomaly detection.
- Cleaned and preprocessed raw sensor data, then validated outputs using scikit-learn ahead of handoff.

Education

SRM IST Chennai

Bachelor of Technology - BTech, Computer Science · (2023 - 2027)

Delhi Public School, Ruby Park

Higher Secondary Certificate, Mathematics, Biology, Physics and Chemistry · (2022 - 2023)

Delhi Public School, Ruby Park

Secondary School Certificate, Mathematics, Biology, Physics and Chemistry · (2020 - 2021)
